Q1. Photosynthesis woh process hai jisme green plants sunlight ki madad se CO2 aur paani se glucose banate hain aur oxygen release karte hain.

Equation: CO2 + H2O → glucose + O2

Q2. Ohm ka law kehta hai ki current voltage ke proportional hota hai, V = IR.

R = V/I = 12/3 = 4 ohm

Q3. Acid khatta hota hai aur base kadwa hota hai. Acid aur base milkar salt aur water banate hain, isko neutralisation kehte hain.
